

Setting your backup plan

A backup plan is a set of rules that specify how the given data will be protected on a given machine.

A backup plan can be applied to multiple machines at the time of its creation, or later.

To create a backup plan:

1. Login into your [client area](#).
2. Click "backup" tab to access Veesp Backup control panel.
3. Click "click here to access Control Panel".
4. Click "Backup & Disaster Recovery" to open control panel.
5. Follow this guide:
