How to reinstall your VPS OS

1. Log in to your client area
2. Click on Dashboard
3. Click on **Virtual Private Servers**
4. Pick VPS you wish to reinstall
5. In the server management page, open the "**Rebuild**" tab on the left side
6. Select the OS and press the "**Re-Install VPS**" button
7. Let the VPS installation complete. It can take ~10-15 minutes.

> ⚠ All of your data stored on the server will be lost without possibility to restore
