How to reinstall a Dedicated server

1. Log in to your client area
2. Click to choose the Dedicated servers
3. Pick Dedicated server you wish to reinstall
4. In the server management page, open the "**Reinstall Server**" tab from the list
5. Select new OS template, enter Hostname and create password
6. Press the "**Submit**" button

7. Let the server installation complete. It can take ~10-15 minutes.

⚠ All of your data stored on the server will be lost without possibility to restore

ⓘ If you need to create custom partitions - you could check the following guide : How to reinstall a Dedicated server with custom partition table via DCI
